

Sealing rubbers

Our standard drab rubber is manufactured to a minimum Shore hardness specification to eliminate any danger of the seal being displaced from the assembly during the transfer of powder from tanker to silo.

Drab rubbers are made from FDA approved material.

We also supply a ranger of rubbers in different materials for specific requirements; please ask for more information.

Nominal bore		Material	Use	Product code
Metric	Imperial			
80mm	3"	Drab natural rubber	General purpose including food*	UDR080
		Brown neoprene	High temperature resistant	UNR080
100mm	4"	Drab natural rubber	General purpose including food*	UDR100
		Brown neoprene	High temperature resistant	UNR100
		Blue natural rubber	Food quality*	UBLR100
		Black rubber	High abrasion resistant	UBR100
125mm	5"	Drab	General purpose including food*	UDR125
150mm	6"	Drab	General purpose including food*	UDR150
Items marked * are made from FDA approved material.				
Minimum quantities may apply for types other than drab.
